MULTIBOOT SUPPORTS PAK LIVE.HUB AND

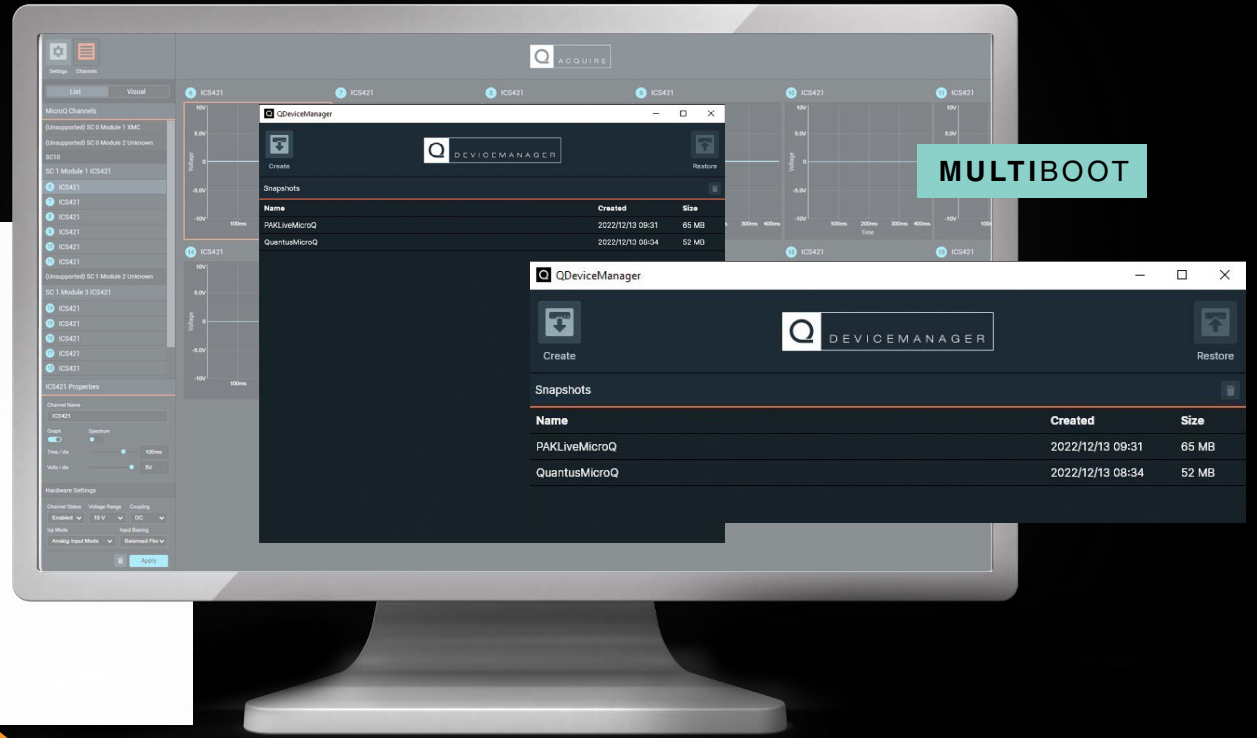

QUANTUSSOFTWARE ON THE SAME SYSTEM

What is Multiboot?*

PAK live.hub and QServer are based on different versions of QuantusSeries firmware. Multiboot adds QuantusSoftware to a system and allows it to boot in multiple modes, configured for use with PAK live.hub or QServer compliant applications. In QServer mode, end users may also access the QServer API to develop their own applications. Multiboot is only needed for PAK live.hub users.

QDeviceManager is used to select the firmware boot mode. The process of reloading the system firmware to change between QServer or PAK boot modes requires approximately 20 minutes.

Multiboot is only available for QuantusSeries DECAQ and the latest Modules compatible with QServer.

MULTIBOOT

PAK live.hub

MÜLLER-BBM
VibroAkustik Systeme

VIBES.technology

WITH MULTIBOOT, A QUANTUSSERIES SYSTEM CAN

BOOT TO SUPPORT MÜLLER-BBM PAK LIVE.HUB

OR QSERVER COMPATIBLE APPLICATIONS

QUANTUS SOFTWARE

Considering Multiboot?

1. Send your system for a Technical Evaluation
2. System is calibrated. QuantusSoftware is installed
3. Add Software from PartnerNetwork of your choice

Your Support

- MECALC - Instrumentation (Calibration and extended warranty), QuantusSoftware and Multiboot
- MÜLLER-BBM VAS SYSTEME - System when running PAK software
- PARTNERNETWORK - System when running integrated software

MECALC IS A HIGHLY SPECIALISED ENGINEERING DESIGN HOUSE WHICH ENJOYS PUSHING INNOVATION AHEAD OF THE GAME.

MECALC researches, designs, develops and manufactures advanced acquisition and control Systems. Since 1984, we've been driven to position ourselves at the forefront of new developments and thinking.

Used to optimise noise, vibration and structural integrity in prototype or quality control testing, our **QuantusSeries** instrumentation is crucial to markets where exceptional development and production quality are essential.

CHARGED TO INNOVATE, we're inspired to create products for those who are as passionate about creating theirs.
